## Get to Know Palliative Care

Palliative care is the principles of care that focus on patients and families' quality of life, being a comprehensive approach addressing the physical, mental, social, and spiritual needs by intensively managing various discomforts. Palliative care provides patients with moral support to continue living.

Most people misunderstand palliative care as simply a way to support the patients, and the care only begins when the patients "give up" and stop a primary treatment. However, in reality, palliative care can be provided in conjunction with other treatments from the moment of diagnosis, and there is clear evidence that the earlier care begins, the better the quality of life for patients can be.

## About Koon

"Koon" is the first specialized hospital in Thailand to provide palliative care. The hospital is inspired by the founder, who is a specialist in this field, being committed to creating a hospital where patients receive close care and feel a special sense of attention and wishing the time that patients and families have together to be beautiful and memorable, and this is the origin of the concept

## Who can Koon take care of ?

Koon Hospital is designed for patients with incurable diseases, and the symptoms of these diseases reduce the patients' quality of life, such as those of cancer, dementia, Parkinson's disease, chronic heart disease, myasthenia gravis and bedridden and other patients.

Koon is ready to provide advice, consultation and palliative care immediately upon diagnosis of a severe illness, coinciding with a primary treatment provided by a physician previously in charge of a patient, until the final stage which may require frequent hospitalizations, assuring that patients and families can rest comfortably and spend as much time together as possible.

**“ Maintaining a good quality of life  
is our priority. ”**

## Koon's Team

- A team of specialist physicians with direct knowledge and experience in palliative care, specializing in the care of patients with various diseases from diagnosis to the end-stage of each illness.
- A Team of Nurse Specialists with More Than 5 Years of Experience in Patient Care and Trained in Palliative Care
- A team of physiotherapists is ready to design activities tailored to each patient's treatment and care.

**“ KOON is ready to provide  
palliative care as soon as  
a severe illness is detected. ”**

## Koon's Place

Koon Wattanapat Hospital is located in Ao Nang area, next to Wattanapat Hospital Ao Nang. The place is surrounded by green spaces, making it peaceful and serene. The uniquely designed rooms are fully equipped with amenities that provide a sense of home, including shared services beyond those typically found in hospitals, such as meditation room, multi-purpose living room, movie room and other activity rooms, allowing you and your family to participate in activities together in a comfortable and confident environment. Meanwhile, specialist physicians and nurse specialists provide close care 24 hours
